Brian,

Thanks for the info. The Iowa DNR would appreciate the chance to have input when/if any new wells are drilled downgradient at the site. Please keep us informed if Superfund does engage in drilling new wells. As I mentioned, I spent some time mapping the bedrock surface at the site and will continue to do a little work here and there as time allows.

Thanks

Since Todd and Manny are gone, can I manage the site assessment task order and get work going at Jefferson, IA?

Subject: Iowa Department of Natural Resources Conference Call - IA SAM Activities

Todd, Stan et al. –

For the remainder of the FY I will be out of the country for post-graduate work in Spain.

I believe Ken and the management team are working on additional personnel to assist with SA and Brownfields activities. For the little bit of the SA world I was exposed to, I definitely learned a lot about what goes on in your shop!!

I will be departing from KC shortly in order to assist with some family matters prior to heading overseas.

I look forward to catching up when I return.

MS

When: Thursday, May 09, 2019 3:00 PM-3:30 PM (UTC-06:00) Central Time (US & Canada).

Where: R7-RO2.A-C09-8/R7-RO

Conference Line 913-551-8644

Passcode 100200

Todd,

Are you available sometime today to discuss a couple of things:

1. Drycleaner inventory
2. PFAS inventory
3. A site situation regarding a unvegetated vacant lot with lead contaminated soil that is in the middle of a residential area. We are wanting to get a good understanding of EPA's authority so we can possible use that as leverage to get the owner to do what we want.

The most urgent item is #3.

We are available after 1:00 today.

Thanks,

Amie
